the left is seething tonight so hard, not cus of some kid but cus them normalizing violence against right wingers for 5 years for the most trivial shit (saying the n word etc) now has consequences

the amount of videos that exist of ppl getting close 2 beaten 2 death for just daring to criticize ethno narcissism or be on the wrong side of the culture war.

It is now evident: you cannot just do that anymore

to tl;dr this trial: I get to call you the N word and if you literally genetically lack the self control to deal with that, its going to be your >problem<
