Internal > External Continuation

ESSENTIAL

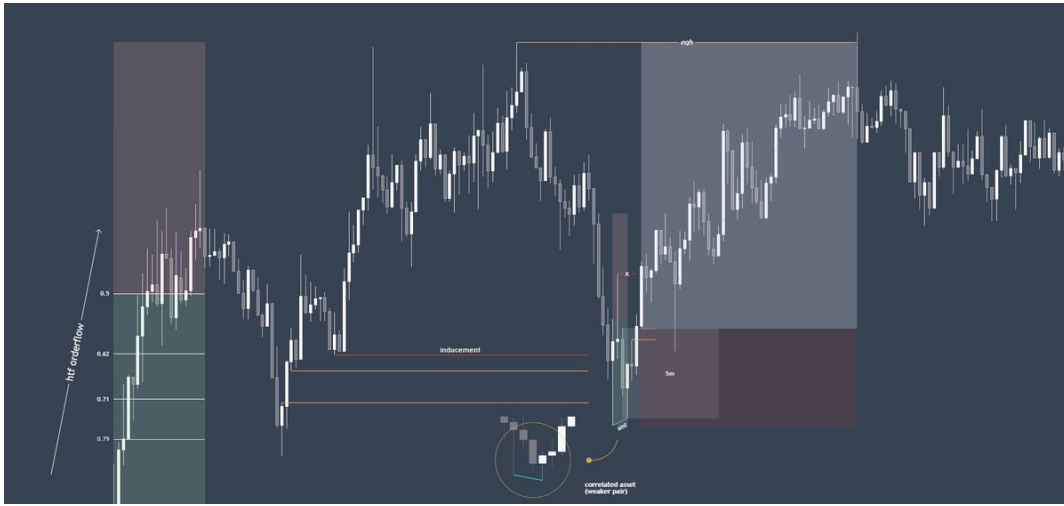

- Follow HTF orderflow
- Unmitigated FVG under inducement (trapping sellers/buyers)
- Clear draw on liquidity
- Discount area of HTF swing/range & local swing after msb (premium for shorts)

EXTRA CONF.

- SMT divergence
- OTE area

It takes patience because it seems price has run off with no chance of getting in but it may seek out internal liquidity later to fuel its next move towards external liquidity. Don't blindly enter on the first FVG, wait for a valid QM in premium/discount depending on direction.
