NEWS: False positives on Spam sites is being worked on and proving to be a constant challenge. They think old versions of paypal for example are phishing sites. Sorry :(
Thanks to the popularity on Hacker News I expect slowdowns and possible service interruption.
As the lists on the homepage grow the site works worse on vintage computers. Currently working on a vintage and modern homepage with auto detection, please be patient.
Downloading of binaries (zip, exe, etc) is now working. Head on over to Tucows and get some great 'l' shareware
