I made over \$3867 from Clickbank in just 47 days with just 1 product.

I wrote an SEO optimized based article about the product then Boom!!

Here is How I did it.

THREAD▯

To make it clear..

Clickbank is an affiliate platform where people sell products and get commision in return.

How did I manage to do that then?

Okay, well

Read the next paragraphs carefully!!

Sit back and enjoy.

1. I created a simple website and started to leverage the power of SEO in writing affiliate articles.

If you don't have a domain (website)?

Fear not.

You still can do it with other free platforms like:

-Blogger

-Wordpress

-Google site

-Medium .com

Zero excuses.

2. I then went to my Clickbank market place and picked the product to promote.

Mine was: Revitaa Pro.

It is the weight loss product.

You can pick anyone of your choice.

No barriers.

3. After picking the product it was a time for content creation & marketing.

SEO did magic for me here.

I did a comprehensive keyword research.

Picked the long tail keywords with low competition + Higher conversions .

Always go for long tail keywords in your articles.

4. Three most important things:

- I opened the 1-3 top pages
- Clearly surveyed them
- Came up with best content

in terms of content Depth & readability.

SEO competitive analysis is the name of the game.

You can't beat your competitors without clearly surveying them.

5. This one is very vital.

On-Page SEO.

This is where the whole game is played.

- H1 H2 & H3
- Quality content
- Proper image optimization
- A Proper keyword density
- Strategic keywrds placement.

This helps Google to easily discover what my content is about and rank it.

6. Lastly, I did a bit of Off-page SEO.

I leveraged the power of social media.

Pinterest and quora.

Posting and commenting strategies.

They helped me to have many visitors as well.

After that I had to chill and wait for Google to do its stuff.

Patience pays off in SEO.
