

1/ Wen launch ☐?

15.04.22

What to expect? 📌

2/ The Nebula launch sequence will be split into 4 main stages

1☐☐: \$LUNA staker airdrop and protocol gov staking + voting enabled

2☐☐: \$NEB Liquidity Bootstrapping (LBP) Event

3☐☐: Nebula Cluster Genesis Proposal

🚩: Full Launch with all protocol features live

3/ Important Dates ☐

- Phase 1: Airdrop Claimable: 15/04/22

- Phase 2: LBP Governance Proposal: 19/04/22

- Phase 2: LBP Period: 27/04/22 - 02/05/22

- Phase 3: Genesis Cluster Proposal: 02/05/22

- Full Launch: 10/05/22

4/ Phase 1: Airdrop to \$LUNA stakers (claimable 18/04/22) ☐

With the airdrop, Nebula's governance functionality will also go live at

This will allow users to stake their \$NEB and take part in poll voting for the later phases of the launch.

5/ Phase 2: Nebula LBP 📍

The event will be initiated through an on-chain vote, using funds from Nebula's community pool.

Proposed LBP pool config:

- Starting \$NEB price: \$2.45
- Starting weight (NEB-UST): 2-98
- Final weight: 60-40
- LBP duration: 5 days

6/ Phase 3: Genesis Cluster Proposal 

Finally, the Nebula team will be working with key community members to create a proposal for the first cluster on Nebula.

The process will start with a text poll on followed by on-chain voting.

Nebula Protocol Forum

7/ Full Launch 

The passing of the cluster creation proposal completes Nebula's launch sequence.

After the proposal is executed, the full protocol will go live with all functionalities enabled.

8/ Users will then be able to

- mint/burn/trade the cluster's token
- rebalance and arbitrage clusters
- provide liquidity to cluster pairs to earn \$NEB rewards
- propose and create additional clusters
- and much more
