## EDUCATION | HTF LIQUIDITY GRAB.

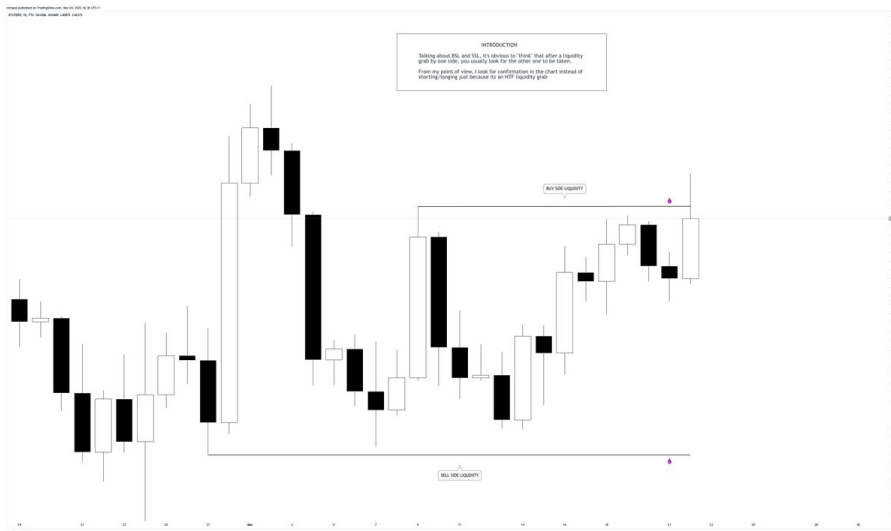

I saw so many people going long/short just because its a sweep, and I'm ok with that, but you're probably going to be stopped even in the M5 without a criteria or a structure break. (at least with crypto)

I'll explain why w/ a BTC scenario.

### 1. Intro

Talking about BSL and SSL, it's obvious to "think" that after a liquidity grab by one side, you usually look for the other one to be taken.

From my point of view, I look for confirmation in the chart instead of shorting/longing just because its an HTF liquidity grab

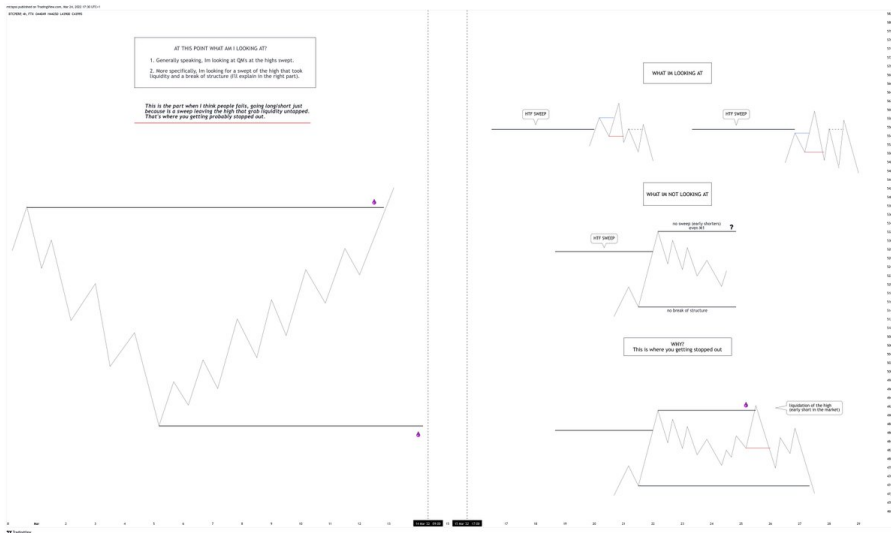

### 2. Entry criteria

What am I looking for after an HTF LG?

What am I "NOT" looking for after an HTF LG?

Why?

3.  
BTC real scenario - part 1.

4.  
BTC real scenario - part 2.

5 - Why are you still shorting without confirmation?

Tivitiko - The most beautiful shape of tweets!
